INTRODUCTION

Memecoin is a type of cryptocurrency that is usually created as a joke or to follow a certain trend on the internet, without any real purpose or utility.

Without Utility, the fact is that Memecoin has captivated crypto players and the strong appeal of this memecoin shows the enthusiasm of the community, both from the Lovers of the memecoin character and Speculators.

Imagine! combining Memecoin + Utility
will certainly have a more solid foundation and a solid community.

In addition to the community, Memecoin usually gets support from native coins on the Blockchain where the memecoin lives. Because, the memecoin is an ecosystem of the blockchain.

The creation of Penyu as a memecoin on the Core blockchain in May 2024 will provide a new color as an innovative memecoin and a strong boost to the Core ecosystem.

PENYU Token is a MemeCoin Crypto Asset on the #Core Blockchain that implements Burning, Staking and Referral Program, becoming an Innovative MemeCoin on the Core Network and popularizing *A Herd of Turtles/Penyu*, as in memecoins on a herd of dogs, cats, or frogs such as PEPE, Shiba, Doge, Wif, Floki or Cat.

Blockchain Core is created from a combination of Bitcoin and Ethereum technologies that successfully solve the Blockchain Trilemma (Decentralization, Scalability and Security). Blockchain Core also directly provides benefits with staking features to Bitcoin asset owners.
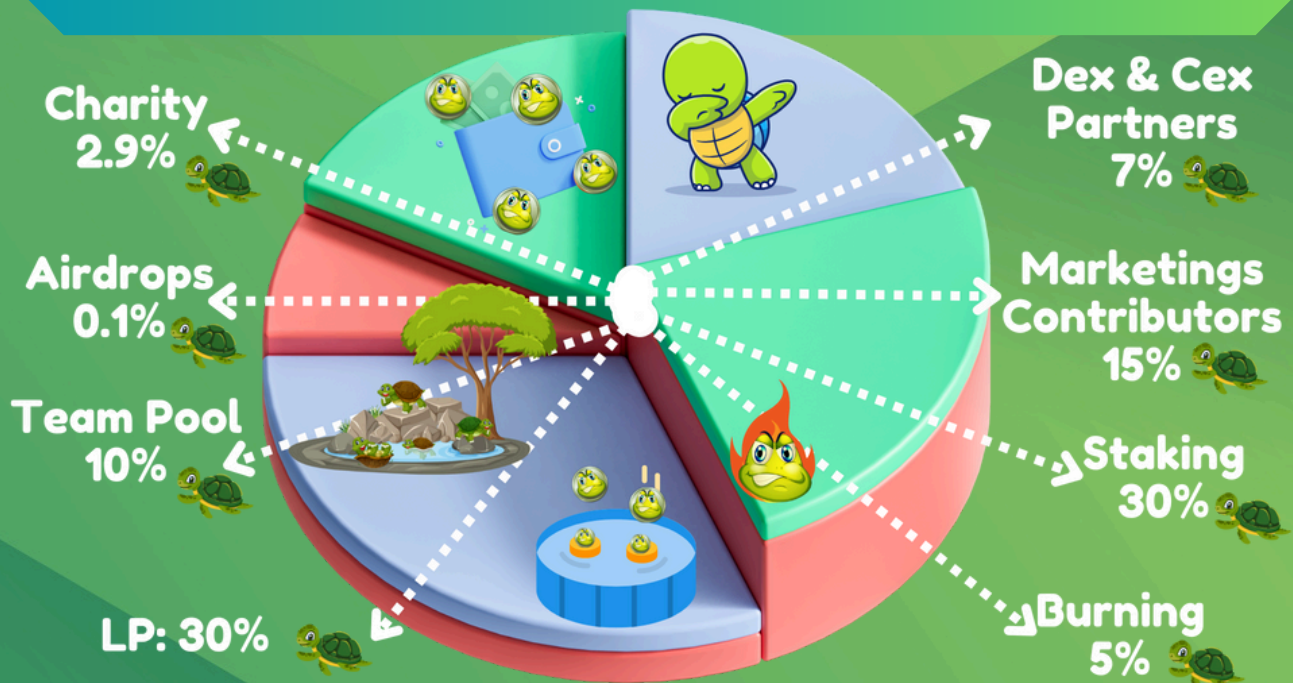

Blockchain core was launched in 2022 and is believed to be a popular and widely adopted blockchain. This optimism is a strong and right reason for the Penyu to be created in the Core blockchain. Turtle is here to strengthen the ecosystem in #CoreDao

Tokenomic Penyu

Initial Total Supply= 210.000.000.000.000 Penyu;

Burning 5%

Burning

Burning Token; Burning 5% of the total supply (10.5 Trillion Penyu). Burning Penyu assets/week lasts for 3 years.

Token burning will reduce Penyu Stock, without ever being able to add Penyu Stock again. This will create scarcity in Penyu assets, so it will have a positive effect on the value over time.

Total Penyu Supply in 2027:
210,000,000,000,000 - 10,500,000,000,000
**= 199,500,000,000,000 Penyu**

Staking + Referral

STAKING is an attraction for Investors. Assets grow by obtaining Staking Rewards. Staking is very appropriate especially for non-trader holders, as pure Investors to obtain asset growth in an EASY way.

Referral Program is related to Staking. Anyone has the right to become a PENYU PROMOTOR and provide their web3 staking link to get Referral Rewards.

- **Minimum Stake 2,1 Billion Penyu**

Staking Rewards

Staking Rewards Per Day= Total Staking x 0,05%
"adding staking will reset staking rewards, then do Claim Staking Rewards, before Turtle Stake is added.

Penyu Stake Fee = 10%
Staking fees are deducted from the number of Penyu per Stake and only once for Active Staking forever (Until the Stock of 63T Penyu Mined Runs Out) which is estimated to last more than 10 years of mining.

Rewards / Mining is running directly when Staking is Active. Rewards Non Stop 24 Hours without stopping as long as it is not UnStaken

The mining mechanism with Turtle Staking makes it easy to get Penyu.

No expensive Mining Machines, No Voting, No Asset Locking with Time Contracts. Turtle Mining is only in one Active Turtle Stake.

Claim Staking Rewards

Claim Staking Rewards Anytime, Anywhere.

Active Staking, Stakers can immediately Claim Rewards

Cheap Claim Fees without Turtle deductions and directly into Wallet Balance

Unstaking Penyu

UnStake Penyu Anytime (No Penyu Staking Time Contract)

UnStake serves to take back **Penyu assets & rewards** at once in the Staking Contract to the Turtle Wallet owned. Turtle UnStake can be done at any time and without Turtle deduction fees.

Share the Penyu Staking web3 link and get Referral Rewards every time a Staker Stakes a Penyu **(Number of Turtles x %Level)**

Level1: 4%
Level2: 2.5%
Level3: 1%
Level4: 0.5%

Result of 100 billion from Staker Level1: 100 m x 4% = 4 billion Penyu

Decentralized Finance

Penyu Token is stored in a Non-Custodial wallet in a decentralized manner 100% controlled by the asset holder/owner. No third party has authority over the asset. However, each holder must secure a key for access to their asset vault called a Passphrase.

Penyu Token as an asset has been successfully created, it cannot be changed, manipulated, or removed. Penyu as a crypto memecoin has finished being an Asset and the next is only the development of its ecosystem and utility that makes it an innovative memecoin.
